Elevate Your Lifestyle with Seamless Sophistication
and Cutting-Edge Technology

BRIGHT AND CLEAR

Unparalleled luxury with 360°
panoramic views for an
elevated experience

WIDER VISIONS

Slim alloy aluminum frame
for a modern and luxurious
aesthetic

DETAIL ORIENTED

Integrate safety and comfort
into all details for
manufacturing guidance

TRACTION COUNTERWEIGHT GANTRY

TRANS Elevator
make life better! | 05/06

The lift car operates smoothly with uniform force, low power consumption, and fast speed.

The motor does not require oil replacement, is pollution-free, and environmentally friendly

Mature technology, wide application, low maintenance cost

Top height of only 2450mm is sufficient, with fewer installation requirements

Longer life and better value for money

Strong sense of security and higher safety in the car

BRINGING YOU
AN INTELLIGENT AND
FUTURISTIC LIFESTYLE

DRIVE AND CONTROL

Our patented e-Motor proves to you a state of the art motor system that enhances efficiency and power.

- “Star-sealing” function prevents the elevator from stalling or falling while operating, improving safety;
- Smooth running and low noise;
- Different from traditional geared drum machine, Trans e-Motor drum drive is characterized with high efficiency, durable life span and low noise during operation;
- Low starting current has very limited impact on family power grid.

Standard

Optional

Control system

The new generation TRANS control system has made a breakthrough on traditional design concept by integrating modern aesthetic elements combined with the advanced e-Drive control technology. Our breakthrough portraits the perfect combination of aesthetics and technology by creating more compact and minimalistic designs with enhanced user interfaces.

NEW e-Touch

Smart home lift control system with password protection

LUCKY PANEL C Mechanical-embedded COP

e-Touch II 13.3-inch (Big screen)

e-Touch III 13.3-inch (Full screen)

Touch I - L 10.1 inch LCD touch screen

e-Call

e-Call, ensure that users can promptly call out for help when trapped in the elevator.

- When the elevator fails to run, the e-Touch function will appear an emergency call interface, passengers can select a preset caller to call for help; If a fault occurs and stops running for more than 6 seconds, the system will automatically dial the emergency contact number.
- The e-Touch function allows passengers to contact preset mobile numbers in the system in case of emergencies.

T-BOX APPLICATION

With our exclusive "T-BOX" App, you may control your lift with your phone or tablet anytime, anywhere.

While using the app, you can know:

- Real-time lift operation status
- Real-time lift information
- Long-distance lift controlling
- Lift fault record
- Lift running record

SOS ALARM DEVICE

This function can send the distress signal triggered by the car to the alarm network platform through the Internet of Things alarm device. The alarm network platform quickly triggers a distress message and sends it to the designated mobile phone.

In case of power failure, the SOS backup battery can keep the alarm device working for 48 hours, so that passengers can be quickly rescued if they are trapped in the elevator.

e-Lighting

The ice blue ambient light is noble and elegant, bringing gorgeous visual effects to customers, and fully showing the luxury of the home lift.

Interactive ambient interior lighting that flows along the running direction of the elevator, offering you with a vibrant and lively riding experience.

STANDARD FLUCTION

RELIABLE

- Hoistway self-learning
- Automatic fault diagnosis
- Voltage fluctuation detection
- Door re-open signal (Auto door)
- Automatic relevelevelling system allows the elevator to relelevel itself after maintenance mode.
- Auto correction of floor position signal
- One-button emergency calling system (Customer provides mobile phone card)
- Position and floor name record during power-off
- Emergency rescue device
- Auto emergency rescue device
- Repeated close door(Auto door)
- Automatic fault record system
- Floor bypass setting
- Lift running time protection function

COMFORT

- Automatic door opening on arrival (Auto door)
- Directionless or co-directional same floor hall calling opening (Auto door)
- Door-open button(Auto door)
- Door-close button(Auto door)
- Energy saving function
- Flooring and lift status indicator
- Flexible floor setting
- Automatic main landing return
- Floor and elevator status indicator (HB2)
- Double-tap cancellation for misoperation
- Open and close button (Auto-door)
- Manually floor selection
- Car ventillation
- Floor indicator set by users
- Elevator monitoring app T-BOX(13.3-inch touch screen COP standard configuration)
- Music playback function (13.3-inch touch screen COP standard configuration)

SAFE

- Inspection mode
- Door closing time protection(Auto-door)
- The light curtain protection device
- Emergency running operation
- Speed feedback detection
- Buffer device
- Unintended car movement protection
- Safety circuit protection
- Faulty relay detection protection
- Limit switch protection
- Upper and lower limit protection device
- Overheat protection
- Electric brakes
- Pre-torque output
- End station for speed and floor number correction
- Low-speed self-rescue
- Car rollback protection
- Contactor feedback detection
- Overspeed protection function
- Door lock disconnection protection function
- Door lock short-circuit protection function
- Change stop floor function
- Overload sensor
- Power trip lighting and alarm
- Closed door protection(Auto-door)
- Manual operating on car top preferred
- Timing self-test
- Child anti-trap hand sensor(optional)
- Faint protection(optional)
- SOS rescue
- Self-rescue running mode(13.3-inch touch screen COP standard)
- e-Sliding key rescue(13.3-inch touch screen COP standard)
- Instant emergency messaging - Emergency wireless calling function
- Man-trap auto calling system
- Double anti-stall protection
- Password floor unlock function(13.3-inch touch screen COP standard)
- Biometric floor unlock function(13.3-inch touch screen COP standard)
- Level switch fault protection function
- Frequency converter overcurrent, overpressure, and overheat protection
- Hoistway self-learning failure protection function
- Steel belt broken detection
